**Subject:** UB Emissions - Slides for Ute Tribe Meeting 12/1/16

[UBemission\\_Summary\\_TribalMtg120116.pptx](#)

Per our discussion, given the interest from the Tribe, the governor and operators to use the UB EI-2014 for our U&O FIP, here are a couple of slides to tee-up the concept that we are working on a detailed comparative analysis on different emission numbers, all submitted by the Operators. The gist is that we had Uinta Basin research showing a discrepancy between top-down and bottom-up. With this new inventory, that discrepancy has widened.

As you know, we intend to run our analysis by the Tribal Air Program and then by the Operators with UDAQ and the Tribe in attendance, We will then send specific questions to each operator where discrepancies between the submittals have been noted.
